Project Name	A Comprehensive Measure of Well-Being

Brainstorming & Idea Prioritization

Project Title

A Comprehensive Measure of Well-Being: Human Development Index Prediction Using Machine Learning

Brainstormed Ideas

Idea	Description
HDI Prediction	Predict the Human Development Index using socio-economic indicators.
Country Development Analysis	Compare development levels of different countries.
Life Expectancy Analysis	Analyze how life expectancy affects HDI.
Education Impact Analysis	Study the relationship between education and HDI.
Income-Based HDI Prediction	Predict HDI using Gross National Income.

Selected Idea

Develop a machine learning model that predicts the Human Development Index (HDI) of a country using key development indicators such as:

- Country
- Life Expectancy at Birth
- Mean Years of Schooling
- Gross National Income Per Capita

The trained model will be deployed as a Flask web application where users can enter these values and receive the predicted HDI along with the corresponding human development category.
