Project Name	A Comprehensive Measure of Well-Being

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
□ Rectangle	External Entity	Represents the user who interacts with the HDI Prediction System by providing inputs and receiving prediction results.
○ Circle / Rounded Rectangle	Process	Represents system operations such as input validation, HDI prediction using the Linear Regression model, and result generation.
Data Store	Data Store	Represents stored data, including the trained Machine Learning model (model.pkl) and prediction-related data.
→ Arrow	Data Flow	Represents the movement of data between the user, processes, and data stores throughout the prediction workflow.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.

DATA FLOW DIAGRAM (DFD) – HDI PREDICTION SYSTEM
